# ABOUT

**Library** and **classroom** design focuses on creating functional, aesthetically pleasing, and user-friendly spaces, which is for housing collections of books or creating a positive learning environment.

Ambience and environment matter more than ever. Feeling cozy and seeking coziness is more than just a comfort measure. With the correct choice of wall coverings, we can even influence student's motivation in a classroom, and break the stereotypical of dull libraries with a space full of coziness and welcoming atmosphere.
