FACTORY IV

INDUSTRIAL DESIGN

It's high time we got down to brass tacks at home. This collection has just arrived with a lot of **warehouse and factory charm**. Factory IV has everything you need for the popular industrial style: for example, rustic materials, concrete looks, plaster structures or rough masonry with authentic traces of wear and tear.

Iron, marble and geometric patterns made of wire are also essential here. They are presented with a fine patina, sometimes in rusty red, sometimes in steel grey. It looks **chic and warm** at the same time. Add freshly painted white as well as cosy nuances such as copper, natural beige or midnight blue.

Anyone who wants to add an architectural touch can also conjure up an impressive backdrop in the living room with the **large-format factory motif**. That's a promise.
